CAREER OBJECTIVE

Computer Science undergraduate specializing in AI Machine Learning with hands-on experience in Python, Machine Learning, and NLP. Seeking Software Development, AI/ML, or Data Science opportunities to leverage technical and analytical skills in solving real-world problems.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science (AI & ML)

2022 – 2026

Malla Reddy University, Hyderabad

CGPA: 8.60

TECHNICAL SKILLS

Programming Languages: Python, Java, SQL

Data Science & Machine Learning: Pandas, NumPy, Scikit-learn, Machine Learning

Data Visualization: Power BI, Matplotlib, Seaborn

Web Development: HTML, CSS, JavaScript, React.js, Flask

Databases: MySQL

Tools: Git, GitHub, Jupyter Notebook, VS Code

Core Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems

PROJECTS

Campus Navigation Using Agentic AI

May 2026 [GitHub](#)

- Traditional campus navigation methods are confusing and inefficient for large universities.
- Developed an AI-powered navigation system using Agentic AI, NLP, and pathfinding algorithms for smart route guidance.
- Used Python, React.js, Flask, NLP, Dijkstra Algorithm, and A* Search Algorithm for system development.
- Improved indoor navigation efficiency with real-time route planning and navigation assistance.

Image Caption Generator

Nov 2024 [GitHub](#)

- Generating meaningful captions for images requires complex visual and language understanding.
- Developed an Image Caption Generator using Vision Transformer (ViT) and NLP techniques for caption generation.
- Used Python, ViT, NLP, Flask, and TensorFlow/PyTorch for deep learning model implementation.
- Built a system capable of generating context-aware image captions automatically.

Automatic Headline Generator

Mar 2024 [GitHub](#)

- Generating news headlines manually is time-consuming for large datasets.
- Developed an NLP-based Automatic Headline Generator using T5 Transformer and Flask for real-time headline prediction.
- Used Python, NLP, T5 Transformer, Flask, and Hugging Face Transformers for model development and deployment.
- Built an automated text summarization and headline generation system.

CERTIFICATIONS

- Data Analytics Job Simulation – Deloitte (2024)
- Introduction to Data Science – Cisco (2023)
- Develop Gen AI Applications with Gemini and Streamlit – Google Cloud (2024)
