CAREER OBJECTIVE

Aspiring Data Engineer and AI Developer with expertise in Python, machine learning, and full-stack development, with hands-on experience in building and deploying data-driven applications. Passionate about designing scalable data pipelines, developing intelligent models, and delivering efficient, production-ready solutions that solve real-world challenges.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science (AI & ML)

2022 – 2026

Malla Reddy University, Hyderabad

CGPA: 8.57

SKILLS

Programming Languages: Python, Java, SQL

Data Engineering: ETL Concepts, Data Processing, Data Cleaning

AI & Machine Learning: Machine Learning, Deep Learning, NLP, Transformers

Libraries: Pandas, NumPy, Scikit-learn

Frameworks & Tools: Flask, React, Git, GitHub

Data Visualization: Power BI, Tableau, Excel

PROJECTS

Automatic Headline Generator

Mar 2024

[GitHub](#)

- Developed an NLP-based system using **T5 Transformer** to generate concise news headlines.
- Fine-tuned the model on a custom dataset and deployed using Flask for real-time predictions.
- Built an end-to-end pipeline for text summarization and deployment.

Image Caption Generator

Nov 2024

[GitHub](#)

- Built a deep learning model combining **Vision Transformer (ViT)** and NLP for caption generation.
- Designed an end-to-end system integrating image feature extraction and text generation.
- Developed a full-stack application using Flask and frontend technologies.

CERTIFICATIONS

- Data Analytics Job Simulation – Deloitte (2024)
- Introduction to Data Science – Cisco (2023)
- Develop Gen AI Applications with Gemini and Streamlit – Google Cloud (2024)

ACHIEVEMENTS

- Built multiple AI and full-stack projects integrating machine learning with real-time applications.
- Strong problem-solving skills with knowledge of Data Structures and Algorithms.
- Consistently maintaining a CGPA of 8.57 in B.Tech (AI & ML).
